The war has begun..

We all believed in
peace and respect for
one another..

How can we become
an example for
different people
in the universe..

...If we are unable
to sustain a
stable society?

I assume this is all because of the Sok'as, but I'm not exposing this publicly...

As the Sok'as are now a part of us

In today's news everyone is united..

They could even record our dreams...

I'm sure that one day, our work will be recognized as one of the greatest inventions ever...

Sok'as providing energy to millions..

מכשיר סוק'אס מספק אנרגיה למיליונים

AUUGGHH!

But this technology
should have been
limited and studied
much longer before
being implanted
everywhere on
Talifa
and used
for civilian
purposes...

Day 0

Profits, always profits...

If one day someone finds this recording, then you should know that the A.R.K program only chooses civilizations that are in danger. So, you shouldn't care about what happened to us Talifans or whatever you decide to call us, but you should care about your own civilization! Analyze and review the issues on your planet, and if you find a way to solve or reduce the problems, do it! You probably won't have a second chance...Oh, one last thing : leave the A.R.K as soon as you can, the Sok'as might interfere with your health too. While this technology has been a

I sense a lack of confidence in your voice. Is something wrong?

Oohh.. I don't know..

Let's see, the world collapsed, millions of people died. The survivors are, on one hand the useless government and it's army, and on the other those junkie mutants who wander the streets like savage beasts. The two are at constant war with one another. And, to top it off, they keep using the Sok'as, the very things that caused all of this. So, yeah, everything is DANDY!

Stan'ey you are depressed. It is too dark in this room. My sensors detect that the weather outside is sunny. Why don't you go and get some fresh air?

UGH! We went over this yesterday!

You need someone to take care of you. By the way, are you hungry?

... And not only will I allow everyone to use the Sok'as in town, but I will increase the research budget in order to..

I should delete all these old recordings...

Watching old videos will not improve your situation

That's the most sensible thing you've ever said.

All these memories...

...I wonder if they will be saved forever in the Kula? As soon as I activate it that is..

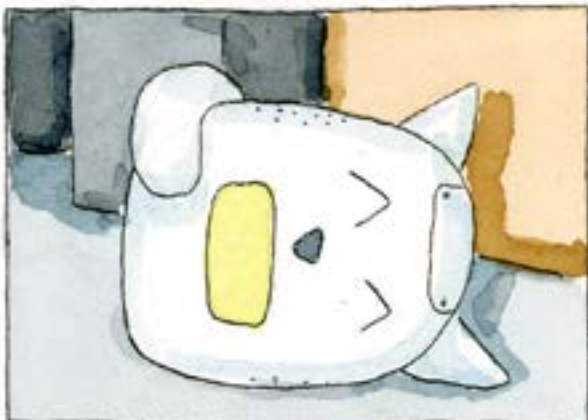

I still don't understand why the Sok'as suddenly became so dangerous

They seemed so... PERFECT.

Hmmm....

I should upgrade your memory, so that you can remember the past better. If I die, or worse, who will tell our History to Oliv'r? He wasn't in town on Day 0, and he was too young to even remember it if he was.

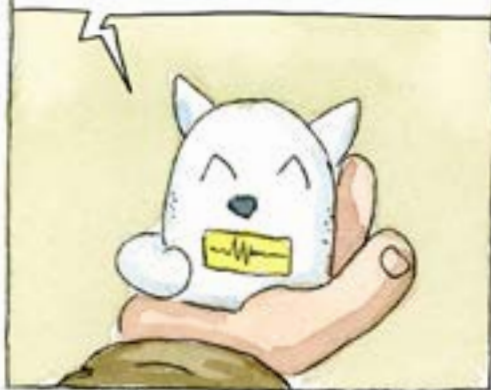

He didn't witness
the end of our world
with his own eyes,
and it's important
that he knows...
Someday he will
want to learn more
about the
old civilization.

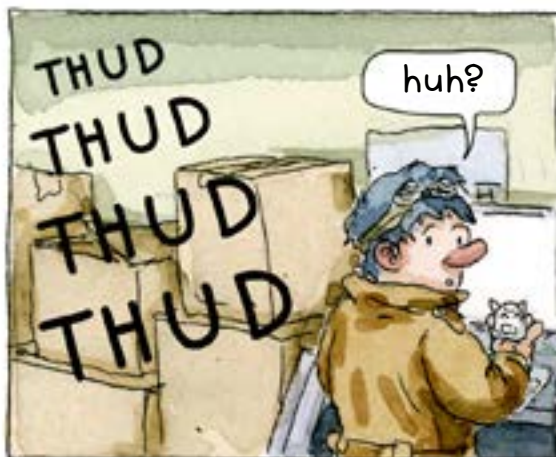

You're being too
pessimistic, Oliv'r
would be sad if you
die. Why don't you
go play outside
in the sun together?

By the way,
are you hungry?

Haha... yes.

Did you get there
through the sewers?

Yeah! As you asked. But, it
would be faster through
the old market streets!

OK then,
Follow me!

Careful! I heard a group of Suk's around there..

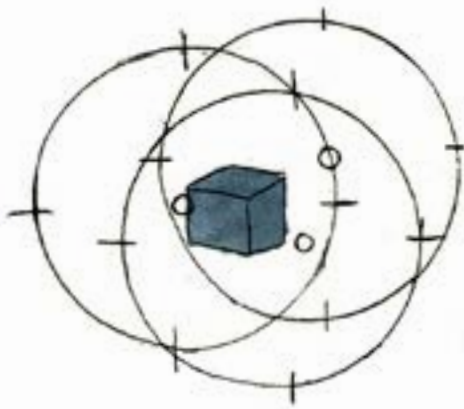

That sucks.

hehe

It wasn't there when
we came this way
the other day...

That's why I
think it's
a trap.

I know that you don't
trust this technology
anymore, and want to
avoid it at all cost, but
you told me once that the
Sok'as used to be
everywhere in your life,
and very useful. I think we
should get closer and study it.
Don't you think it could
come in handy?

NO! As a scientist, from the old civilization,
I know much more than you can even comprehend,
but still don't know that much about the Sok'as.

Never forget that they are the cause of
all that happened on day 0.

All the Talifans became dependent of this
technology, and most of them transformed
into Suk'rs.. these **MUTANTS** addicted to
those **THINGS**! It's proof that there is
something abnormal about them.

And we shouldn't be taking any
unnecessary risks like trying to
learn more about them!

Probably, I was in the sewers
and couldn't count them

It's a girl! Stan! They're attacking a girl!

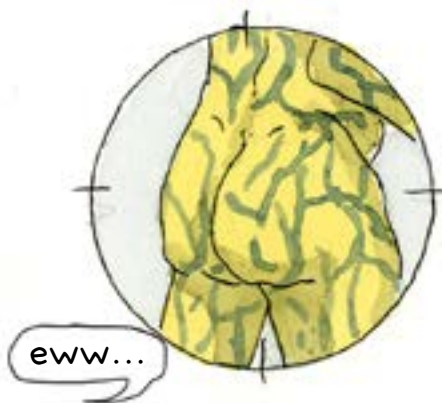

Calm down, or they'll hear us...

Look, she could just be one of them. You know that they're completely mad. They could have decided to kill each other to decide who gets the Sok'a..

But, what is..

Definitely not!
She's just....

One of the most
beautiful creatures
I've ever seen!

Let me see!

NO!

We have to
save her!

She's probably
insane!

Come on!

It's no use! We can't
defeat five Suk'rs!

Come on,
let's go.

SIMON MESNARD

JOHN CARVAJAL

ANTERRAN

Millions of years ago. A Talifan scientist named Stanley helped to develop a project that would change the face of the universe: the Sok'a technology, also known as Black Cubes. They quickly became a success on his planet, Talifa, and people started to use them everywhere in towns and villages as a way to communicate, save data, record dreams and improve daily life. Many projects related to the Sok'as were also developed in secret, including military equipment. Talifans had a lot of ambition. At this stage of their History, things couldn't have gone better for them, but something unpredictable happened. In the capital city, someone suddenly screamed in the street. A wave of panic spread in the country, and quickly invaded the whole planet. A dreadful accident had occurred, causing the death of millions of innocents. The world would never ever be the same. The very few survivors who didn't lose their mind now refer to this event as "Day 0"...
